

# What's in Your Jug?

- ✓ Higher Potassium Levels
- ✓ High Quality K-Acetate
- ✓ *NO HYDROXIDES!*

- X Lower % Potassium
- X Less Effective K
- X Contains Hydroxides

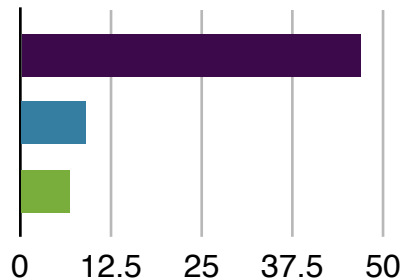

## Not All Potassium is Created Equal...

**Terra Bonne K28** is a potassium-acetate product that not only contains a higher potassium percentage than competing brands, but is made with NO HYDROXIDES! Using a high quality, high performing nutrient ultimately results in lower costs.

According to a research study at Texas A&M University, Acetate-based potassium has up to five times the foliar absorption compared to other forms of nutrients.

Foliar Absorption

■ Potassium Acetate ■ Potassium Thiosulfate ■ Potassium Nitrate
