

TERRA BONNE

PHITE-IT SI 0-0-26

(Plus 1% Silica)

Potassium Phosphite & Potassium Silicate Fertilizer

Phite-It Si 0-0-26 is a revolutionary combination of Potassium Phosphite, Potassium Silicate, and Potassium Acetate. Utilizing a unique “Triple K” technology with *3 separate sources of potassium*, Phite-It Si represents the most advanced phosphite product available for turf today. While the phosphite chemically enhances the turf’s resistance to stress and increases metabolism, the silica physically hardens the turf, increasing physical resistance to stress and damage. Potassium acetate is added for supreme foliar absorption that is up to five times greater than traditional forms of potassium.

Guaranteed Analysis:

Soluble Potash (K2O).....26%
Derived from: potassium phosphite, potassium silicate, and
potassium acetate.

Directions For Use:

TURFGRASS		
<i>Applications</i>	<i>Rate</i>	<i>Comments</i>
Warm season turfgrass	6-8 ounces per 1,000 square feet	Apply every 7-14 days for maintenance. Apply in a minimum of 2 gallons of water per 1,000 square feet.
Cool Season Turfgrass	4-6 ounces per 1,000 square feet	Apply every 7-14 days for maintenance. Apply in a minimum of 2 gallons of water per 1,000 square feet.
Overseeding, sprigging, or laying of sod	2 gallons per acre	Apply at the time of germination, sprigging, or laying of sod and at 14 day intervals thereafter in a minimum of 100 gallons of water per acre until turf is well established.

Lot # 122911

Net Weight: 11.6 lbs per gallons

Net Contents: 2.5 Gallons
